**Importance:** Normal

The following is forwarded to you from Ross Dannenberg:

Ari,

Attached please find a first draft patent application (15 pages, including claims and abstract) and drawings (4 additional pages, Figures 1-5) for the above referenced matter. Please have the inventors review the attached materials and let us know of any changes that need to be made or general comments to the application.

In reviewing the application, the inventors should keep in mind the following:

- 1) Enablement: The application must enable one of ordinary skill in the art to make and/or use the invention.
- 2) Best Mode: The best mode of making and/or using the invention must be disclosed. The best mode is subjective, so it is the best mode that you (the inventors) believe to be the best mode.
- 3) Written description: The application must describe the invention with sufficient detail that it is apparent that the inventors were in possession of their invention at the time the application is filed.

Also, please note and respond to questions in [BRACKETS] embedded in the application.

Please feel free to respond to embedded questions and make any necessary changes directly in the attached Word document. However, please ensure that the tracking changes feature in Word is turned on (Tools \ Track Changes \ Highlight Changes \ Check first two boxes).

We would also like to bring to your attention the possibility of filing a design patent application to protect the physical shape of the browser device. This can be advantageous to protect the design that will be used for production devices, and our firm can prepare the necessary paperwork for a minimal amount. Please let us know if you would like to discuss this aspect further.

Please let us know if you have any questions. We look forward to receiving your revisions and comments.

Regards,

Ross Dannenberg
